

Available before the current-node RD search

Source and block information, coding parameters, and previously coded causal-neighbor partitions

Early decision

Terminate the node as
PARTITION_NONE?

Yes

Skip the remaining
partition alternatives and
their recursive descendants

No

Generated during the current-node search

Evaluate PARTITION_NONE

J_{none} becomes available

Evaluate PARTITION_SPLIT and recurse

Evaluate rectangular and extended partitions

Select best partition

RD cost of the best partition
